

Class Examples

Week 4

The Addition Program

- We want to create a program that will add two numbers together and return the result. Unlike previous exercises, we will continue to ask the user for numbers until they no longer want to use our program

Program Breakdown

- Need to get numbers – two numbers
- Need to add those numbers
- Need to display the results
- Need to keep going until the use says No
 - Let's use Y to keep going and N to stop

Countdown program

- Create a program that will count down from a specific number to 0

Better countdown program

- Create a countdown program that will count down to 0 from a provided minute value
 - Display the results to the screen

Add the total purchases for a day

- We want to keep track of our grocery purchases for a day. We then want to know how much we spent.
 - Some days we may not enter anything – so it should display no amount was spent.
 - The purchases vary from day to day
