Class Exercises Strings

Week 7

Longest word

- Create a program that will tell you which word is the longest word.
  - Make sure that no extra spaces are added
  - Keep asking for words until they say they are done (will take y or N or n or Y)
  - Identify if the word is the same (like Dog or dog) or if it is the same number of characters (like ice and wet)

Working with Strings

- Create a program that will verify if a password is valid

- The rules are must be 10 characters min in length

- Must contain only letters, numbers - no special characters or spaces

- Let the user know if the password they entered is valid

- Create a function that will check the password
